

Did you know the library subscribes to electronic databases that you can use your library card to access from anywhere?

Electronic Databases are online collections of encyclopedias, magazines, and other nonfiction reference materials.

Different databases specialize in different subjects and offer easy ways to search multiple sources at once.

Many of the databases feature multimedia sources, including videos, pictures and sound, to make learning come to life.

Frequently Asked Questions

Where can I find electronic databases?

On our website under the kids section: <http://nhfpl.org/kids/homework-help/> Scroll down to see each database listed by subject.

Will I be able to understand the materials?

There are different databases for different grades and many of them have options to search within a specific reading level.

But my teacher said “No Internet!” for this project.

Unlike Google or Wikipedia, all of the information in the databases has been carefully selected for credibility, just like the books you can get at the library. Many databases are simply electronic versions of physical books and encyclopedias. Most articles even give you the information you need for your Works Cited or Bibliography pages.

How to find materials to help with homework anytime, anywhere, online!

Electronic Databases for Science Math Language Arts & Social Studies !
