

Charm Necklace

Supplies

The supplies included in this kit are:

- Necklace chains
- Charms
- Jump rings

The supplies you may need to provide are:

- Pliers (optional)

Instructions

1. Take your chain and decide where you would like to put your first charm.
2. Separate the ends of the jump ring by grasping on either side of the opening and twisting them apart. It can be helpful to use a set of pliers to help grasp the ring.
3. Slip the charm onto the jump ring, then loop the ring through the chain so that they are attached.
4. Twist together the ends of the jump ring so that they are tightly clasped together. This ensures that your charm will not fall off the chain. Make sure that the chain cannot easily go through the gap in the jump ring.
5. Repeat this process and place charms wherever you would like.
